EDUCATION

M.Sc. Computer Science — September 2015 – July 2018
Xiangtan University, Hunan, China
Thesis Title: Security Analysis of Some Image Privacy Protection Methods
Research Interests: Privacy Protection, Cryptanalysis, Image Encryption

B.S. Computer Science — September 2011 – July 2015
Xiangtan University, Hunan, China
The Second Prize Scholarship
English (A), C Language Programming (A), Computer Algorithm (A), Computer Graphics (A)

PUBLICATIONS

Chengqing Li, **Dongdong Lin**, Jinhu Lü, "Cryptanalyzing an Image Encryption Algorithm Based on Pixel Bits," *IEEE Multimedia*, vol. 3, pp. 64 – 71, 2017. (🏆Highly Cited Paper)

Chengqing Li, **Dongdong Lin**, Jinhu Lü, Feng Hao, "Cryptanalyzing an image encryption algorithm based on autoblocking and electrocardiography," *IEEE Multimedia*, arXiv:1711.01858, 2018.

WORK EXPERIENCES

Short-Term Research Project, Hunan University. — December 2017
Digital Image Forensics with Visual Descriptor and Deep Learning.
Assisted Hu et al. with the research of identifying Natural Images and Computer Graphics. This research has been published at https://link.springer.com/chapter/10.1007/978-3-319-72389-1_30.

Developmental Engineer, ZhiWei-ChinaDDOS, Hunan, China. — August 2017
Real-Time Protection System for Website.
Worked with program manager, to develop a real-time protection system for website. Numerous data are collected and analyzed to view that the HTTP traffic is normal or not.

Short-Term Research Project, University of Surrey. — December 2016
Redundancy Reduction for JPEG file.
Collaborated with Shujun Li (Chief of Research) in a short-term research project and the task focus on Reducing Redundancy of JPEG images, while retaining quality and compatibility with recovering unknown DCT coefficients.

PROJECTS

Cryptanalysis of ISEA: https://github.com/MrDongdongLin/Cryptanalysis_ISEA
This project includes codes of the paper "Cryptanalyzing an image encryption algorithm based on pixel bits".

Cryptanalysis of IEAE: https://github.com/MrDongdongLin/Cryptanalysis_IEAE
This project includes codes of the paper "Cryptanalyzing an image encryption algorithm based on autoblocking and electrocardiography".

A LaTeX template: https://github.com/MrDongdongLin/xtuthesis, https://www.ctan.org/pkg/xtuthesis
This project includes a LaTeX template and a Microsoft Word template that provides normative format for graduation thesis of Xiangtan University, among them, the LaTeX template has been received by CTAN.

SKILLS

- Strong typesetting ability of both LaTeX and Microsoft Word, two papers and my graduation thesis are available: Cryptanalysis of ISEA, Cryptanalysis of IEAE, and Graduation Thesis.
- Strong presentation and public speaking skills.
- Technical skills include Matlab programming, Python programming and C/C++ programming, and some software engineering.
- Strong skills in mathematics, statistics, and data analysis.
- Event planning and conference facilitation skills.
